Skills

- TypeScript | JavaScript | HTML | CSS | Node.js | PostgreSQL | MongoDB | React | Next.js
- Vite | RxJS | Redux | Zustand | TailwindCSS | Bootstrap | SuperTest | Jasmine | Cypress
- Docker | Google Cloud | AWS
- Frontend | Backend | Full-Stack | Software Developer | Spanish, English - Professional efficiency

Experience

- | | | | |
|---|--------------------------|--------------------------|--------------------------|
| Full Stack Developer | <u>OrderRev</u> | Madrid, Spain (Remote) | 08/2024 - current |
| <ul style="list-style-type: none">• Development of a robust and efficient API with Laravel and frontend implementation with React and React Router + Vite.• Implementation of development practices focused on scalability, maintainability, and code readability, ensuring that solutions are sustainable and easy to adapt in the future.• Ability to work independently, taking the initiative to overcome challenges and delivering high-quality results within established deadlines. Contributing to the team through proposals to improve processes, optimize the user experience, and foster agile development. | | | |
| Ecommerce Developer | <u>VASS</u> | Madrid, Spain (Remote) | 03/2024 - 12/2024 |
| <ul style="list-style-type: none">• Creation of custom technological solutions to meet the specific needs of renowned clients, including Vass, Repsol, Perfumerías Unidas, and Bella Aurora.• Development of clean, efficient, and readable code for optimized pages, fast loading times, and improved user experience.• Agile methodologies like SCRUM for development, promoting team collaboration and continuous integration, achieving quality solutions and quickly adapting to each project. | | | |
| Full Stack Developer | <u>Arasaka</u> | Mallorca, Spain (Hybrid) | 01/2023 - 03/2024 |
| <ul style="list-style-type: none">• Contributed to an internal company project by developing a software solution to improve data tracking and operational efficiency.• Collaborated with the team to streamline workflows and improve data management processes.• Demonstrated strong problem-solving skills and a commitment to writing clean, efficient code.• Identified areas for code improvement, refactoring and optimizing existing code for better performance and readability. | | | |
| Front-End Developer | <u>AgenciaCom</u> | Mallorca, España(Office) | 03/2021 - 06/2021 |
| <ul style="list-style-type: none">• Development of custom websites for clients using WordPress, PHP, jQuery, JavaScript, and CSS. | | | |

Projects

- **Planify**: I developed my own Trello/Jira using **ExpressJS** and **MongoDB** for the backend, along with **React, Vite, TypeScript**, and **TailwindCSS** for the frontend. The application includes features such as **role management**, different **task statuses**, **drag & drop**, the ability to **add collaborators**, incident **reporting**, and notes associated with each task, along with a **complete authentication system**, including **email verification code**.
- **OrderRev**: I led the development of a digital solutions app for the hospitality industry, handling the **database design**, the **Laravel API**, **Stripe payment integration**, and the frontend. The stack included **Laravel, SQLite (Turso), React + Vite, SCSS**, and **Docker**.
- **SnapLink**: An application inspired by LinkTree, where you can add your social media accounts, and through a unique link, it takes you to a landing page with all of that person's social media. Developed with **ExpressJS** and **MongoDB** for the backend, along with **React, Vite, TypeScript**, and **TailwindCSS**.
- **ExpTracker**: A typical **expense tracking app**, where you add a budget and keep track of expenses. Developed with **Next.js, React, TypeScript, TailwindCSS**, and the backend with **Express.js** and **PostgreSQL**.
- **Perfumerías Unidas**: I **redesigned** the frontend of an **online store**, **improving** the **UI** and **optimizing** the **UX**. **Clean** and **efficient** code was used to ensure **fast performance** and **smooth navigation** on mobile devices, working closely with the backend to integrate new features.
- **POS**: **PoS** where you can add products / categories and keep track of the sales of each product. Developed with **NextJS, React, TypeScript, Tailwind** and **NestJS + PostgreSQL**

Education

- | | | | |
|--|------------------------------------|-----------------|--------------------------|
| Web application development | <u>UEM</u> | Madrid, Spain | 09/2022 - 06/2024 |
| <ul style="list-style-type: none">• Development of full-stack web applications with PHP, React, JavaScript, Docker, Apache, and MySQL. | | | |
| Microcomputer Systems and Networks | <u>Colegio Santa Monica</u> | Mallorca, Spain | 09/2019 - 06/2021 |
| <ul style="list-style-type: none">• General introduction to the fundamentals of computer science, starting web development with JavaScript, jQuery, CSS, and using Apache + Linux. | | | |
